Monthly Index
of
Russian Accessions

Volume 12, No. 11 February 1960

THE LIBRARY OF CONGRESS
WASHINGTON : 1960

INTRODUCTORY NOTE

The MONTHLY INDEX OF RUSSIAN ACCESSIONS* is a record of the publications in the Russian language issued in and outside the Soviet Union that are currently received by the Library of Congress and a group of cooperating libraries. Whenever possible, publications in other languages spoken in the Soviet Union are also included. However, publications in the languages of the U. S. S. R. issued in countries of Eastern Europe are not included, as these are covered by the *East European Accessions Index*.

The MONTHLY INDEX consists of three parts. Part A lists monographs published in 1948 and later; accessions published earlier than 1948 are included. To facilitate the use of the INDEX by readers who are not thoroughly familiar with the Russian language, the title in the original Cyrillic in Part A is preceded by its English translation in brackets.

Part B lists Russian periodicals with their table of contents translated into English. However, accessions printed earlier than 1947 are not included. Certain Soviet periodicals are now translated into English from cover to cover and published regularly in translation in the United States and other English speaking countries. A list of such translated periodicals, with publication and subscription prices, etc., is given at the end of each issue of the *Monthly List of Russian Accessions*. Such periodicals are indicated by an asterisk before the periodical title.

Part C is a subject guide to both the monographs and periodical articles listed in Parts A and B. Monographs are listed under the appropriate subject headings in full, followed by a selected list of articles. For the convenience of readers desiring to examine only monographs or periodical articles, the monographs are printed in slightly heavier type than the periodical articles. Titles of monographs are given both in the original language and in English translation, while titles of periodical articles are given in English translation only.

Sample title: Electric action of the brain in glaucoma. I. S. Levitan, in *Vestnik oftal'mologii*, no.5:8-12 S-O '51.

Explanation: An article with title given above in English translation, written by I. S. Levitan and G. M. Neishtadt, will be found in the September-October issue of the periodical *Vestnik oftal'mologii*, vol. 30, no. 5, pages 8-12.

A list of periodicals included in the current volume, with abbreviations used, appears in each issue of Part C in each issue of the INDEX. The number and letter in parentheses following the periodical title indicate the class and subclass in which it is to be found in Part B. Titles of periodicals included in the current volume appear in numbered order and those not currently received are arranged by subject; the symbols of American libraries other than the Library of Congress known to have current files of each periodical, follow each title.

Except in Part C, the material is divided into 17 subject classes, arranged alphabetically, with numbers within each class. In addition, for the convenience of the reader, the material in Part B is further divided within each subject class into several subclasses. All entries are filed according to the usual Library of Congress system except that ligatures are disregarded. Entries are not duplicated, all listed items are represented in the collections of the Library of Congress. Symbols representing other libraries indicate when items are available in those libraries. Entries without such a symbol indicate that at the time of receipt the material was not available in any cooperating library except in the Library of Congress.

Cumulative author, subject, and periodical location indexes for the first 9 issues of the MONTHLY INDEX are available as separate publications. Beginning with volume 2, no. 10, the author index to the monographs, and a periodical location index for the entire volume, are published as appendices to the first two issues of the following volume.

Orders for microfilm or photostat copies of the listed items that are in the collections of the Library of Congress may be placed with the Photoduplication Service, Library of Congress, Washington 25, D. C.

The MONTHLY INDEX OF RUSSIAN ACCESSIONS is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Price of single copies varies; subscription price, $12.00 a year (foreign, $15.00 a year). Price of Cumulative Index to Volumes 1-3, $1.50; to Volume 4, $2.00.
